FORTNIGHTLY UPDATES

1. SOF Olympiad Examination Update

All **SOF Level 1 and Level 2 Olympiad examinations** for the **2025–26 session** have been successfully conducted, marking another year of **excellent participation by millions of students from 72 countries worldwide.**

2. Appreciation to Participating Schools

SOF extends its sincere appreciation to all participating schools for their continued cooperation and valuable support.

3. Examination Schedule: 2026–27 Session

The SOF Olympiad examination schedule for the 2026–27 session is provided below for your reference.

Be in the SOF Social Media Spotlight

 **SCHOOL COLLABORATION**

Schools can send collaboration requests by sharing SOF Olympiad-related videos on Instagram. After verification, selected collaborations will be accepted and the videos will be featured on our official Instagram platform.

 **STUDENT COLLABORATION**

Students can collaborate with us by posting short Instagram videos on topics like SOF medal wins (National/International), learning journeys or Olympiad experiences. All collaborations will be verified first, and approved collaborations will be showcased on our official Instagram platform.

Follow our social media handles for Olympiad updates and success stories.

Science is cooler than you think!

Yawning Is Contagious and Science Knows

Yawning often spreads from one person to another because the brain naturally copies actions it sees. Scientists link this contagious effect to empathy and social connection. Yawning also helps keep the brain alert by improving blood flow and cooling it slightly--making it more than just a sign of tiredness.

INNOVATIONS THAT CHANGED OUR WORLD FOR FOREVER!

Internet – Connecting the World

By Vinton Cerf & Robert Kahn (ARPANET, 1969)

Vinton Cerf

Bob Kahn

Before the internet, sharing information across countries took days or even weeks. Communication was slow and access to knowledge was limited. The development of ARPANET in the late 20th century laid the foundation for the modern internet, enabling computers to communicate over long distances.

Later, Tim Berners-Lee introduced the World Wide Web, making the internet easy to use and accessible to everyone. Today, students can access learning resources, attend online classes, and explore global knowledge with just a click. The internet has reshaped education, making learning faster, wider, and more accessible than ever before.

SOF Launches the Exclusive Community of SOF Alumni. YOUR SOF JOURNEY DESERVES TO BE CELEBRATED!

TEXTBOOK MEETS REAL WORLD

Why Do We Feel Static Shock in Winter?

During winter, the air becomes much drier because there is less moisture in the atmosphere. Dry air makes it easier for electric charges to build up on our bodies, especially when we walk on carpets, rub our shoes on the floor, or wear woollen clothes. These actions cause electrons to move from one surface to another, creating an imbalance of electric charge.

When you then touch a metal object such as a doorknob, railing, or tap, the built-up charge suddenly escapes. This rapid release of electricity is felt as a small shock. Metal objects allow electric charges to travel quickly, which is why the shock feels sudden and sharp.

This common winter experience is a clear example of static electricity; a concept students learn in physics. It helps explain how charges behave, how electrons move between objects, and why certain materials conduct electricity better than others. What feels like a tiny shock is actually science happening right at our fingertips.

Scientific Conclusion:

Static electricity occurs due to the transfer of electrons between objects. In dry air, charges cannot escape easily, so they build up on surfaces and are released suddenly when contact is made with a conductor, causing a static shock.

TEACHERS HELPDESK

Empowering future Olympiad winners

Dear Educators,

You play the most critical role in shaping young minds for success, and Olympiads are the brilliant platform to ignite curiosity, discipline, and excellence in students.

Here's how you can make a big impact this month-

Celebrate Small Wins: Recognise every effort, whether it's completing a practice test, improving scores, or simply showing up consistently. Use praise in class, sticker charts, or even small certificates to boost morale.

Create a "Challenge Wall" in the classroom: Dedicate a board to weekly brain teasers, Olympiad trivia, or Math puzzles. Encourage students to submit answers and feature their names when they solve them. Gamification works wonders!

Connect Olympiads to Real-Life Success: Discuss how Olympiad skills like Logical Reasoning, Science application, and English proficiency link to careers in Engineering, Medicine, Research, and Public speaking. This helps students see the bigger picture. reframe this for teacher helpdesk

MYTH VS FACT

MYTH

Cold weather causes colds and flu.

FACT

Colds and flu are caused by viruses, not cold weather. However, people tend to stay indoors more in winter, which helps viruses spread easily.

TIPS FOR TEACHERS

Empower Olympiad learners with smart, tech-enabled teaching strategies

1. **Deep-Dive Concept Workshops**-Organize focused sessions to explore advanced topics beyond the syllabus.
2. **Micro-Goal Learning Cycles**- Break preparation into small, trackable goals with weekly online quizzes or check-ins.
3. **Mentor Circles with Past Olympiad Achievers**- Host guest sessions or video interviews with former SOF participants for insight and inspiration.
4. **Global Exposure Through Online Challenges**- Encourage participation in international contests.
5. **Digital Resource Banks**- Create a shared drive or LMS folder with curated Olympiad materials, videos, and problem sets.
6. **Engaging Parents Digitally**- Keep parents informed and involved through digital updates, webinars, or support materials.

WHAT WOULD HAPPEN IF

You Skip Breakfast Before School?

Without breakfast, the brain does not get enough fuel to function properly. This can affect attention, memory, and problem-solving abilities throughout the school day. Students may feel tired, distracted, or find it harder to understand lessons. A healthy breakfast helps maintain energy levels, supports concentration, and prepares the brain for effective learning.

VOCABULARY BOOST

What Does "Analytical" Mean?

"Analytical" describes the ability to examine information carefully, break it into parts, and understand how those parts work together. Analytical thinking helps students solve problems logically and make better decisions.

DO YOU KNOW?

Some Fish Can Recognise Human Faces

Certain fish species can identify and remember human faces, proving that intelligence is not limited to mammals and highlighting advanced learning abilities in aquatic life.

ASTRONOMY FACT

The Moon Is Slowly Moving Away from Earth

The Moon Is Slowly Moving Away from Earth

The Moon drifts about 3.8 centimetres away from Earth every year. Over millions of years, this gradual movement will slightly affect Earth's tides and rotation.
